I. Introduction

Return to a mythical time in the Far East, when the legendary Siamese-Twin Shiva, God of destruction, cursed your village with fearsome evil spirits. You, Master Chu must search through hostile palaces and temples to find and destroy this four armed incarnation of Shiva. If you would like, just ask your teammate, the Drunkard Hu to help out. Playing together can be a lot of fun!

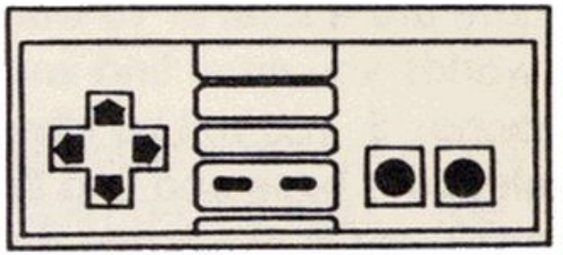
II. GAME CONTROL



Left and Right Arrows: Move Master Chu in the indicated directions.

Up Arrow: Push Up Arrow to jump.

Button A: Push Button A to fire a shot.

Button B: Raises the Fan or the Knife to block shots from enemies.

Select Button: Selects either one or two player mode. Also allows the player to continue a new game from the current world. You are only allowed to continue 3 times. If you pass beyond the 8th world, selecting continue will always put you back to the 8th world.

Start Button: Starts the game. The Start Button is also used to freeze the game during play.

III. GAME MECHANICS

There are a total of 10 worlds and you are allowed 3 lives per player per game. In the first 7 worlds you must find and collect the 8 Symbols of Harmony. When the symbol counter reaches 8, you will be lifted and transported to duel with the boss in that world. You must defeat the boss and find the key which will open the door to the next world. World 8 and 9 permit you to challenge the bosses directly. World 10 is where you will encounter the Siamese Twin Shiva Statue.

Master Chu and his partner (an optional second player), the Drunkard Hu, each starts with 12 units of life force. Every time the Master is hit or comes in contact with an enemy the life force is reduced by 2 units. If the life force is fully depleted and the Master is hit again, you loose a life.

IV. DOUBLE PLAYERS

This game features simultaneous play for two players. If you are playing a double players game and one player looses all three lives, he must wait for the other player to finish. Upon the end of a double players game, both players will be given the option to continue. When the players are too far apart from each other, the screen will stop scrolling until one player moves away from the edge of the screen. This way both players will always remain on the screen.
